Aerocamaras, leading company in work with drones

Founded by Jaime Pereira Gil, Aerocamaras is a benchmark in the RPAS industry in Spain, a leader in drone manufacturing, training and services, Jaime being the sole shareholder. The work and leadership of the entire team that makes up Aerocamaras have led the company to be the leading drone operator in our country.

Drone operator authorized by AESA

More and more new technologies are being incorporated into different facets of society and drones are also being applied to more professional activities. Some sectors already work regularly with unmanned aircraft. Professionals such as those from the security forces (Police, Civil Guard or Army), emergency services (firefighters, water rescue or search and rescue teams), personnel in charge of carrying out technical inspections, topographical surveys and, of course, audiovisual projects already they know the possibilities of RPAS.

This industry is constantly growing and new applications for drones are appearing every time. This growth generates new professional opportunities for RPAS pilots. The savings in time and costs, together with

the minimization of risks in different situations, make unmanned aircraft the best solutions in multiple situations. This has favored the growth of a company like Aerocamaras, authorized by the State Aviation Safety Agency (AESAs) to operate drones in Spain and offer all these advantages to its customers.

International Projection

Aerocamaras international expansion

Drone service providers with international projection

Positioned as the No. 1 drone operator in Spain, Aerocamaras is working on its international expansion, having already carried out projects in more than 15 countries. We continue to grow and take our experience in training drone pilots to countries such as Mexico or Portugal, carrying out inspections of electrical networks in Kuwait, audiovisual projects in Mexico, Colombia, Thailand or the Philippines and a multitude of technical innovation jobs that support our experience

Solutions

Learn more about **Aerocamaras Solutions**

Manufacture of professional drones in Spain

Our product development department has specialized RPAS engineers, model aircraft and test pilots. We have created the AeroHyb brand, which encompasses all the products developed by Aerocamaras. AeroHyb Hexacopter is our main advantage over the competition, a hybrid drone with 7 hours of autonomy designed to carry out professional services such as technical inspections, emergencies, security, topography, precision agriculture or audiovisual.

The hybrid engine that equips the AeroHyb Hexacopter combines electricity and gasoline. This system marks a before and after in the drone industry, characterized by reduced flight times. The main advantage of the Aerocamaras hybrid drone is its ability to transport a load of up to 5 kilograms for approximately 2 hours. In addition, it allows flights of up to 7 hours.

It also stands out for not needing battery boxes or chargers; With just 2 fuel fills it is capable of operating all day. The aircraft is prepared to work in all types of sectors, with interchangeable loads. It has been tested by the most experienced pilots of our company for 15 months, which allows us to GUARANTEE its characteristics and ensure that it is the best option in the professional drone market (agriculture, cinema, advertising, TV, topography, inspections, security , emergencies, fishing, surveillance...).

Features of AeroHyb Hexacopter

Autonomy up to 7 hours

The best hybrid drone on the market for flight times and specifications

Guaranteed Features

Tested by expert pilots for 15 months

Foldable and easy to transport

Versatile for all types of services

100km operating range

Load up to 5 Kilograms

No batteries or chargers needed

Possibility of mounting all types of cameras on the market
(HD/Zoom/Thermal/Others)

Light rain resistant

Specific preparations for emergencies, topography, precision agriculture or technical inspections with original systems developed by Aerocamaras

Leaders in drone pilot training

Specialized training as an advanced RPAS pilot offers a wide range of possibilities to all those people who see in this profession a job opportunity with a future. Aerocamaras is the leading school in Spain, with more than 30,000 certified students. In addition, we have an international job bank.

Our drone pilot centers have become a national reference. We have more than 30 schools distributed throughout the national territory and instructors and examiners with more than 25,000 flight hours.
