## Global Drone Inspection

The future is here with Global Drone Inspection

Perfect performance of your assets is essential for delivering high quality results. What if we told you there's a risk free and cost efficient way of achieving that perfect performance? Global Drone Inspection performs worldwide surveys on your assets with this century's most forward technology: drones. Not only do we get to play with drones every day, we provide you with reliable information on maintenance needed for you asset. Whether you're working on a ship, in the oil and gas industry, or infra and steel industry: we know just how to support the quality of your services. Our experienced team goes above and beyond to inspect your assets under the surface, in the air and even in confined spaces.

# Proposed Solution

## Global Drone Inspection

### Examining cargo holds

When our team of certified experts inspects cargo holds, we make sure our keen eye goes to the following:

- Check if hold is free of rust or loose paint that could contaminate or discolour your cargo
- Inspect if your hold is free of previous cargo
- Look for elements that may react with future cargo
- Check for any signs of moisture or previous water damage in the hold or bilge

### Up close and personal

With no need for cherry pickers and scaffolding, we can get as close and detailed as you'd like and create an overview both within one day time. Our surveys usually take a few days, depending on the size of the project. Within this time frame, costs and downtime are reduced to up to 80%. Other advantages include:

Follow the trends - With footage and data collected over time, you're able to make a trend analysis of the cargo holds

Rules and regulations - Instantly knowing if your holds meet necessary criteria

Safe - Sadly, lots of companies still experience accidents in the work place. Safety is something that needs to be top of mind.

Live streaming - Create or adapt your maintenance plan whilst looking at our live footage

No influence - Our drones have no influence on cargo operations

Global Drone Inspection likes to help you ensure your cargo is as good as it is before loading and after travel. Get in touch and we'll get back to you as soon as possible.
